# ON NOVEMBER 11TH JOIN THE GENERAL STRIKE

**They told us that if we worked, we would have a decent wage and a roof over our heads.**

**But we are working harder and harder only to live worse. And this isn't just a problem for those who rent. Getting a mortgage is almost impossible, and those who manage it live in fear of losing their job and, with it, their home. Everything is going up: rent, groceries, electricity. Meanwhile, a minority is getting richer and richer.**

**In recent weeks, following the eviction of Maricarmen and the suicide of Olga, something has shifted. Everyone agrees that we cannot go on like this. In Catalunya alone, over 120,000 people have marched to say enough is enough. Now we must take the next step: a general strike. If everything comes to a standstill, governments, employers' associations, and landlords will no longer be able to ignore us. This is how we won the eight-hour working day over a century ago.**

**We need you to change the rules of the game. On November 11th, join the general strike.**
